

Basic layout

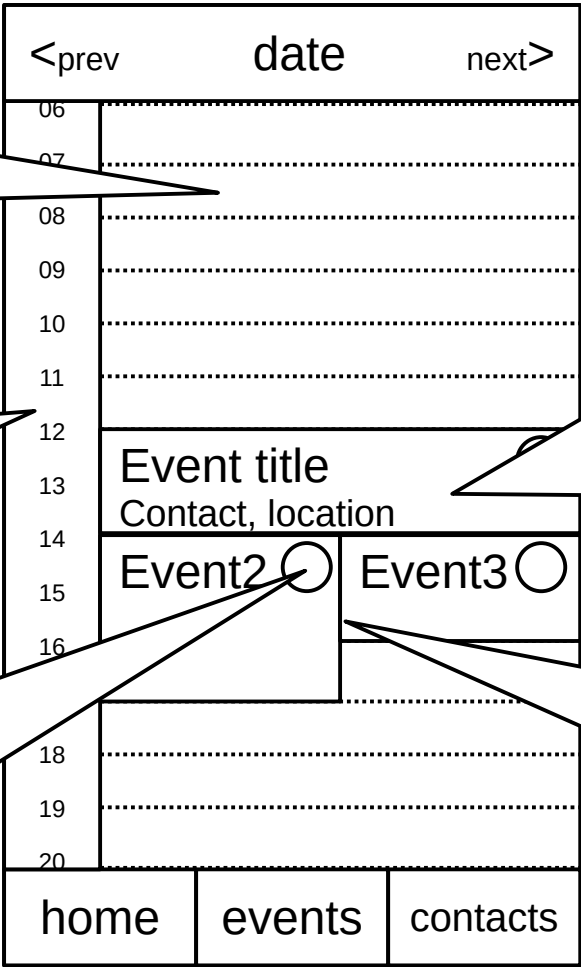

Events View

Event list:
scrollable and
zoomable
along y axis

Timeline with
a dotted line
for each hour

Used to indicate
event status
Unmarked: not happened
Green: happened and
details have been recorded
Yellow: happened, not
recorded
Red: event didn't end up
happening

An Event: has a title,
and if room allows, it'll
show one or two
names associated with
the event and the
location if applicable

If multiple event occur
simultaneously, they
will auto resize

Tapping
an event
opens up
editable
details.
Tap and
hold
allows the
user to
move the
event

Tapping on the timeline or an empty space on the event list will open up the Event Editor. The general hour mark where the tap occurred should auto fill the time

Start and end times are editable to specify that data

A dropdown list to select the event type

Tappable button to switch between 'happened', 'didn't happen', and 'not recorded'

List of people involved in this event. Tapping on a name opens their timeline

This view should also be scrollable along the y axis

Displays t-minus
till the next event

Month preview. Each
box is a link to the
day. The date is
displayed and the
percentage is how
full the day is (based
on a 16 hour day).
